DVI Detective PLUS

An easier way to store EDID for HDTV

Computers and HDTV video source devices can sometimes lose the EDID -- basically the electronic identification of a display which lists its possible resolutions and frequencies. When displays are switched away or disconnected and then reconnected, the EDID can be lost and the computer or HD video source device can lose the ability to display the image properly.

The Gefen DVI Detective Plus allows you to switch or relocate HDTV or Computer video displays while "tricking" the source devices into thinking that the display is still present -- maintaining smooth video operations throughout the process.

You simply program the DVI Detective Plus for the display that you will use, by performing a programming step while having the device connected to the display and a power adapter. Next, you put it into place on the video output of your video source and restart your equipment. When all sources and displays are powered on, seamless functioning of video source and display equipment will commence. External buttons make EDID programming and settings operations a breeze -- formerly, some operations could require opening the unit.

Features:

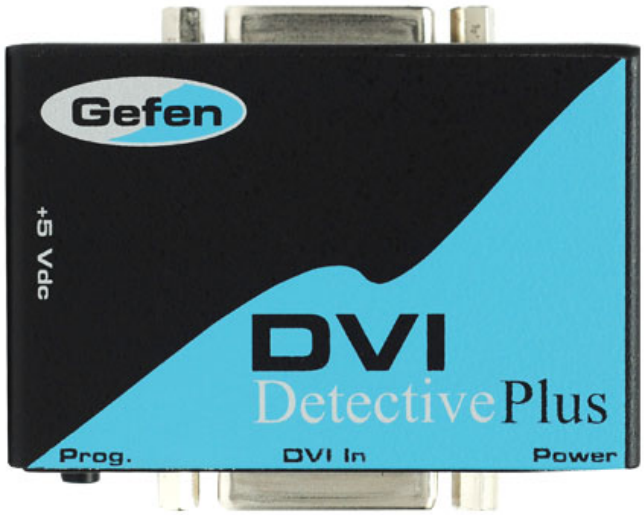
- Store EDID information for displays
- Passes HDCP copy-protection protocols for full HDTV, using an HDMI to DVI adapter (not included)
- Supports resolutions up to 1920x1200, 2K, and 3840x2400 (Dual Link)
- Can eliminate CAT-5 lines used to carry DDC signals when extending computer video
- Keeps computer systems from deactivating inactive DVI ports
- No power required after initial programming

Specifications:

DVI Connector:	DVI-I 29 pin female
Power Supply:	5V DC
Power Consumption:	5 watts (max)
Dimensions:	2.7” W x 1.5” H x 2” D
Shipping Weight:	1 lbs

Package Includes:

- 1 foot DVI Dual Link M-M Cable
- 5V Power Supply
- User's Manual



RoHS COMPLIANT 2002 / 95 / EC
